Summary

I turn your sales, finance, and operational data into dashboards and reports that help managers make faster, better decisions.

Technical Skills

- **Data Analysis & Modeling: ETL Processes, Data Cleaning, Statistical Analysis, KPI Tracking.**
- **Business Intelligence: Power BI (Advanced DAX, Power Query), Dashboard Design, Automated Reporting.**
- **Programming & Databases: Python (Pandas, NumPy, Matplotlib), SQL (Complex Queries, Data Extraction).**
- **Spreadsheets: Advanced Excel (Pivot Tables, Power Query, VLOOKUP)**

Projects

1. Banking Loan

- **Developed a Banking Loan Dashboard in Power BI analyzing 38,576 loan applications worth $435M+, tracking KPIs such as MTD/MOM trends, average interest rate (12.05%), and DTI ratio across loan status categories (Charged Off, Current, Fully Paid).**
- **Designed interactive multi-page reports with advanced DAX measures and dynamic slicers (Year, State, Purpose), revealing that 86.18% of loans were in good standing, while identifying debt consolidation as the top loan purpose at 18.2K applications.**
- **Delivered actionable lending insights by segmenting borrower profiles across home ownership, employment length, and geography, enabling stakeholders to assess portfolio risk and optimize loan approval strategies.**

2. LinkedIn Jobs Analysis

- **Built an automated LinkedIn job scraper using Python (BeautifulSoup & Pandas) that collected and structured 240 job postings across 72 companies, 26 locations, and 2 countries — storing cleaned data in CSV format ready for analysis.**
- **Developed an interactive Power BI dashboard to visualize job market trends, revealing a 4x surge in Data Analyst postings from July to September (28 → 116 jobs), with dynamic slicers for Country, Location, Job Title, and Company filtering.**
- **Integrated the scraping pipeline with n8n workflow automation, enabling fully scheduled, hands-free data collection and processing — eliminating manual intervention and ensuring continuously updated, analysis-ready datasets.**

Experience

Intern | Digital Egypt Pioneers Initiative (DEPI)

- **Completed a 6-month Data Analytics internship at DEPI, gaining hands-on experience with core tools including Python, SQL, Power BI, and n8n workflow automation, building practical skills in data collection, cleaning, and visualization.**
- **Appointed as Team Leader for the program's final project, coordinating task distribution among team members, managing deliverables, and ensuring successful on-time completion, demonstrating leadership and collaboration under real project conditions.**
- **Pursued continuous self-learning after the internship, independently building advanced projects including a Banking Loan Dashboard (Power BI) and an automated LinkedIn job scraper, reflecting strong initiative and commitment to professional growth.**

Education

Bachelor's degree in commerce

Languages

- **Arabic: Native.**
- **English: B2 (Upper Intermediate).**
